Firefox - Disable warning when accessing secured sites

June 2014

Firefox - Disable warning when accessing secured sites

Each time you access a secured website /page (HTTPS) Firefox displays a small security notification. To disable this notification:

- Open Firefox.
- In the address bar type the following command:
- about:config
- Click on the "I'll be careful, I promise..." button
- In the Filter field type:**security. warn_entering_secure**
- Double click on this entry and set its value to False
- Close the about:config window and restart Firefox.
